

Project User Stories

As someone new to working out I want to be able to go to a centralized location to find workout plans from others so I know where to start

As an experienced person to working out I want to be able to upload various workout plans that worked for me so I can help others.

As someone new to working out I want to be able to quickly search for workouts that I want to focus on.

As an experienced person to working out I want to be able to track all sorts of info such as nutrition guidance

As someone exploring a workout I want to be able to see what others are saying about it so I know how good it is.

As someone exploring the website I want a good looking user interface so that I can quickly find the workout I want.

As someone exploring workouts I want to be able to see either tutorials on workouts so I do them properly

As someone trying a workout plan I want a place to contact others about how to do it so that way I don't have to ask others at the gym

Project BDD Scenarios

1. Scenario: User exploring the page

Given I am on the homepage

When I click workouts

Then I should be brought to various workout sections

When I click on one of the workouts

Then I should see the plan in front of me

And be able to print it out or save it

2. Scenario: User wanting to add their own workout plan

Given I am on the login page

When I enter my credentials & click login

Then I should be brought to a page full of my work

When I click add

Then I should be brought to a page that inserts a title & content

When I save that plan

Then others can see the plan I posted

3. Scenario: User looking for a workout

Given I am on the homepage

When I click the search bar

Then I will be brought to a search option

When I insert leg workouts

Then I should see a list of leg workouts

And be able to click on one to view it

4. Scenario: User adding a workout under a general section
Given the user is already logged in
When I click add workout section
Then select what my workout falls under
When I click save
Then others can find that workout under that category

5. Scenario: User wants to see comments on a workout
Given the user is on the workout they want
When I scroll down I can see comments
And do this without logging in

* General Sad Paths

1. I click workout & there is nothing there
2. It allows user to add blank workout plan
3. Leg workouts has other random workouts included
4. User tries to add workout w/ no category
5. User can not see comments
